PROFESSIONAL SUMMARY

DevOps Engineer with more than 2 years of hands-on experience setting up **CI/CD** pipelines, using Docker and Kubernetes to package microservices, and using Terraform and Ansible to set up scalable AWS infrastructure. Pipeline automation and proactive monitoring led to a **45%** increase in system uptime and a 60% decrease in the time it took to deploy. able to work on their own in remote locations and work together across functional boundaries to create reliable platform solutions.

CORE COMPETENCIES

- **CI/CD & Automation:** Jenkins, pipeline-as-code, (build, test, deploy) automation, workflow optimization.
- **Cloud Infrastructure:** AWS (EC2, RDS, IAM, Lambda, SNS, CloudWatch).
- **Containerization & Orchestration:** Docker, Kubernetes (deployment, scaling, reliability management).
- **Infrastructure as Code:** Terraform, Ansible for AWS provisioning, configuration management.
- **Version Control:** Git, GitHub
- **Security & Monitoring:** IAM least-privilege policies, secure networking, CloudWatch alerts, SNS
- **Operating Systems:** Linux administration (user/group management, permissions, security hardening)

PROFESSIONAL EXPERIENCE

DevOps Engineer | [Razorflow.ai](#)

July 2024 – Present

- Designed and maintained **Jenkins CI/CD pipelines** automating build, test, and deployment workflows for more than **8 microservices**, reducing manual release effort by **70%** and cutting average release cycle time from 2 days to under 8 hours.
- Deployed and orchestrated **10+ containerized** services using Docker and Kubernetes on AWS EC2, achieving **99.5%** deployment success rate and enabling **zero-downtime** rolling updates for production workloads.
- Used **Terraform** and **Ansible** to create infrastructure-as-code (**IaC**) that sets up and manages more than **10+ AWS resources** (EC2, RDS, IAM, Lambda, SNS). This cut the time it takes to set up environments by **80%** and stopped configuration drift between dev, staging, and prod.
- Made **Linux** server security stronger by automating user and group management and enforcing permissions on more than 10 servers. This cut down on misconfiguration incidents by **90%** and made sure that all servers followed leastprivilege access policies.

Software Engineer | [Synchronoss Technologies Pvt Ltd](#)

Sep 2022 – Jun 2024

- Analysed and processed **B2B financial data** for CMS applications, supporting accurate reporting for **5+ enterprise clients** and maintaining **99%+ data accuracy** across monthly reporting cycles.
- Parsing **JAVA and XML** to replace manual data workflows, reducing processing time by **65%** and eliminating repetitive manual work.

KEY PROJECTS

CI/CD Pipeline Automation for Microservices

- Built end-to-end Jenkins pipelines integrated with Docker and Kubernetes on AWS EC2, cutting deployment time by **60%** and enabling consistent, automated delivery across **8+ services** with zero manual intervention.

Monitoring & Alerting System

- Designed a CloudWatch + SNS + Lambda observability stack tracking **20+ metrics**, enabling proactive incident detection and reducing MTTR by **40%** for improving production uptime from 97% to **99.5%**.

EDUCATION

Master of Computer Applications (MCA)

8.36 CGPA

Kakaraparthi Bhavanarayana College | 2020 – 2022

Bachelor of Computer Science (MPCS)

7.52 CGPA

Kakaraparthi Bhavanarayana College | 2016 – 2019
